The Planet Export Cosmetics Stands for Uncompromising excellence

“ The biggest challenge is to stay focused. It's to have the discipline when there are so many competing things. ”

From Concept to Creation: The Planet Export Expertise in Private Label and Custom Cosmetic Manufacturing

Private Label Manufacturing Process

We offer businesses worldwide the opportunity to create and produce high-quality beauty products with their own branding. We have an extensive range of tried and tested stock formulas. Beauty brand owners can select any formula from them to develop under their own brand name. With our flexible MOQs, competitive pricing, and quick turnaround times, we make it easy for businesses to create their own cosmetic products without the need for expensive production facilities.

Worried that if other beauty brand owner picks the same formula that you have already picked and which may create two products with exact same formula in the same market?

Don't worry. We have covered that too!

We offer custom cosmetic manufacturing services to help businesses worldwide develop unique and innovative beauty products. Our team works closely with clients to develop customized solutions that meet their specific requirements and deliver high-quality products in the shortest possible time.

With our flexible MOQs, competitive pricing, and strict quality control measures, we are a trusted partner for businesses looking to develop and manufacture custom cosmetic products.
